PROFESSIONAL SUMMARY

Builder-operator with 2+ years shipping production systems across manufacturing, ERP, CRM, e-commerce, AI, and data engineering. Currently Technical Lead and COO of Zamm's Closet, where I drive end-to-end operations, lead technical architecture, and own product strategy from concept to launch. Comfortable owning P&L, designing data pipelines, and shipping Next.js storefronts often in the same week. Targeting roles at the intersection of software engineering, technology leadership, product management, and data-driven decision-making.

CORE COMPETENCIES

Technical Leadership & Architecture · Product Strategy & Roadmapping · Full-Stack Engineering (React / Next.js / Node / Python) · RAG & AI Systems · Data Engineering & BI · E-commerce Platforms (Shopify) · Business Operations & P&L Management · Salesforce CRM · Agile / Cross-functional Execution

TECHNICAL STACK

Languages: Python, TypeScript, JavaScript, SQL, C++ | **Frontend:** React, Next.js 15, Tailwind CSS, Shadcn/ui, Vite

Backend / Data: FastAPI, Node.js, PostgreSQL, Supabase, pgvector, ChromaDB, LlamaIndex | **AI/ML:** RAG systems, Gemini, Ollama (local LLMs), Fashn.ai

DevOps / Infra: Docker, Railway, Vercel, Cloudflare Pages, GitHub Actions, Ubuntu / Linux | **Tools:** Odoo, Shopify (Storefront & Cart APIs), Salesforce, Cloudfare, Razorpay, Notion

EXPERIENCE

Technical Lead & COO — Zamm's Closet

Jan 2026 – Present | Hyderabad

Zamm's Closet is an ethnic and bridal wear boutique. I own the full spectrum: chief operator by day, lead engineer by night — driving business strategy while architecting and shipping the production tech stack.

- Designed, Developed and Shipped a Shopify + Next.js 15 e-commerce platform (Supabase, Shadcn/ui, Razorpay, Cloudflare Pages) from scratch, reducing manual order processing time by ~60%.
- Built internal data systems and business intelligence dashboards, enabling data-driven decisions on inventory, margins, and marketing spend.
- Own P&L, supplier negotiations, financial tracking, and budgeting; produce weekly performance analytics for leadership.
- Lead cross-functional decisions aligning technology, operations, and business objectives across a lean team.
- Driving e-commerce growth through data-led digital marketing strategy, including Meta ads evaluation and content calendar execution.

Business Manager — Zamm's Closet

Nov 2025 – Jan 2026 | Hyderabad

- Spearheaded digital transformation: automated procurement and inventory workflows, cutting operational overhead by ~90%.
- Managed end-to-end manufacturing operations and supply chain, ensuring consistent stock levels and on-time delivery.
- Oversaw financial operations, delivering cost-optimisation insights that improved gross margin by 25%.

Business Analyst Intern — Zamm's Closet

Aug 2025 – Oct 2025 | Hyderabad

- Conducted market research and competitive analysis across ethnic wear segment; surfaced three actionable product-line opportunities.
- Analysed sales data to identify underperforming SKUs; recommendations drove a 20% improvement in stock turnover.
- Produced monthly business reports presented directly to founders.

Data & Operations Intern — SFA (Sales Force Automation)

Sept 2024 – Nov 2024 | Hyderabad

- Maintained and cleaned Salesforce CRM database, ensuring data integrity across sales pipeline records and customer accounts.
- Developed Excel dashboards and managed spreadsheet-based workflow systems, improving team task completion rates and operational visibility.
- Led a 3-member coordination team for on-site meetings with the director, supporting large-scale event execution end-to-end.

Campus Lead — EdVenture Park

Nov 2024 – Jan 2026 | Hyderabad

- Led campus entrepreneurship and innovation programs, mentoring student teams through ideation to prototype.
- Drove cross-campus startup events, managing logistics, speaker outreach, and participant engagement.

President & Founder — TEKNIVA Technical Club, GIET

Feb 2025 – Aug 2025 | Hyderabad

- Founded and scaled a 100+ member technical club focused on applied ML, web development, and product thinking.
- Organised workshops, hackathons, and industry speaker sessions, establishing the club as GIET's flagship tech community.

KEY PROJECTS

Full-Stack Production & Business Management System

- End-to-end web application for garment production and retail operations management, replacing manual spreadsheet workflows.
- Modules: Dashboard (KPI overview), Inventory management with Inventory Gallery, Productify (production tracking), Accounts, Subcontractors, Customers, Orders, Export Data, Reports, and Admin Panel.
- Built with React, TypeScript, Tailwind CSS, Supabase (PostgreSQL), and Shadcn/ui; role-based access control via Admin Panel with RLS policies.
- Inventory Gallery provides visual product catalog management; Export Data module enables one-click CSV/Excel data extraction for reporting.
- Reports module with drill-down analytics and Admin Panel for user/permission management shipped as core features.

DocuMind — AI Personal Memory Assistant

- RAG-based personal knowledge system built with LlamaIndex, ChromaDB, and Google Gemini embeddings (768-dim, pgvector on Railway).
- Migrated from Voyage AI + Groq to Gemini stack; recalibrated cosine-distance thresholds post-migration to maintain retrieval precision.
- Explored multilingual retrieval (Spanish/German) and Instagram content ingestion pipeline.

Lab Master — Optical Billing & Lab Management System (Freelance)

- Full-stack SaaS (React/Vite/Supabase/PostgreSQL) with multi-vendor lens pricing, prescription logic, and GST invoice generation.
- Implemented row-level security (RLS) hardened with SECURITY DEFINER functions and join-based policies for multi-tenant isolation.

LensBillPro — Billing App (customized matrix implementation) Freelance

- Next.js app for an optical client; shipped end-to-end from requirement gathering to production deployment.
- Delivered ~90% faster billing workflow vs. client's prior spreadsheet process (avg. bill time reduced from ~15 min to under 1 min).

EDUCATION

B.Tech, Computer Science & Engineering (Data Science) — [Global Institute of Engineering & Technology](#)

Sept 2022 – Aug 2026 | GPA: 7.7/10 | Hyderabad

- Relevant coursework: Machine Learning, Data Structures & Algorithms, Database Systems, Statistical Modelling, Big Data Analytics.
- President — TEKNIVA Technical Club: founded and led the institute's flagship technical community (100+ members).
- Vice Class Representative: liaison between student body and faculty for academic and administrative matters.

Intermediate, Science (MPC) — [Narayana Junior College](#)

July 2020 – Aug 2022 | GPA: 9.1/10

- Focus: Mathematics, Physics, Chemistry — strong quantitative and analytical foundation.
- Consistently ranked among top performers in batch; built rigorous problem-solving discipline that now underpins data and engineering work.

10th — [Rising Sun High School](#)

June 2012 – March 2020 | CGPA: 10.0/10

- Achieved perfect CGPA across all subjects in the SSC board examinations.
- 5-time Class Representative: demonstrated early leadership, communication, and organisational skills.

CERTIFICATIONS & TRAINING

- Full-Stack Web Development , Python Programming
- Object-Oriented Programming in C++
- Deloitte Australia Technology Job Simulation (Forage)
- Campus Ambassador , EdVenture Park

WHAT I BRING TO A TECHNICAL ROLE

- **CTO lens:** Own architecture decisions, pick the right stack for constraints, and build systems that scale without unnecessary complexity.
- **PM lens:** Translate business problems into scoped product requirements; done this for internal tooling and customer-facing features with real budget and deadline pressure.
- **Operator lens:** Run cross-functional execution manage vendors, finances, and engineering simultaneously, understanding the full business context behind every technical trade-off.

Open to full-time roles, freelance partnerships, and strategic consulting engagements.
